

commands **message commands**

Message Commands List

List of all `message commands` available in the bot.

The prefix for the bot is `)` or `m!` or `minato`
i.e. either of following would work
`)help`
`m!help`
`minato help`

Also by mentioning Minato you invoke commands i.e.
`@Minato Namikaze help`

And in DM's only `m!` works i.e. only `m!help` in DM's

Use `)help command` for more info on a command.
Use `)help category` for more info on a category.
Use the dropdown menu below to select a category.

Support Server

For more help, consider joining the official server over at <https://discord.gg/vfXHwS3nmQ>

How do I use this bot?

Reading the bot signature is pretty simple.

`<argument>`

This means the argument is required.

`[argument]`

This means the argument is optional.

`[A|B]`

This means that it can be either A or B.

`[argument...]`

This means you can have multiple arguments.

Now that you know the basics, it should be noted that...

You do not type in the brackets!

Shinobi Match

An amazing shinobi match with your friends

- match

Play shinobi match with your friends using the characters from `Naruto Verse`

Parameters Required: `opponent`

Usage: `[prefix]match <opponent.mention>`

Aliases: `shinobi_match, matchwith, shinobimatch, match_with`

QuickPoll

Create polls

- polltime

Create polls easily

Aliases: `poll, polls`

- tally

Get polls results

Parameters Required: `poll_id`

Usage: `[prefix]tally <poll id>`

Aliases: `result, results`

- quickpoll

Makes a poll quickly.

Parameters Required: `questions_and_choices`

Anime, Manga and Waifu

Some anime, manga and waifu related commands

- animesearch

Searches Anime from MAL and displays the first 10 search result.

Parameters Required: anime_name

Usage: [prefix]animesearch <anime.name>

Aliases: anisearch, animesearchbyname, anime_search_by_name, searchanime, searchani

- aboutanime

Displays about the anime using the MAL ANIME ID. get it by using animesearch command.

Parameters Required: mal_id

Usage: [prefix]aboutanime <mal.id>

Aliases: aniabout, animeabout, anime_about_by_mal_id, knowanime, aboutani, anime

- mangasearch

Searches Manga from MAL and displays the first 10 search result.

Parameters Required: manga_name

Usage: [prefix]mangasearch <manga.name>

Aliases: magsearch, mangasearchbyname, manga_search_by_name, searchmanga, searchmag

- aboutmanga

Displays about the manga using the MAL MANGA ID. get it by using mangasearch command.

Parameters Required: mal_id

Usage: [prefix]aboutmanga <mal.id>

Aliases: magabout, mangaabout, manga_about_by_mal_id, knowmanga, aboutmag, manga

- waifu

Get random waifu and marry them! UwU!

Aliases: w, wfu, wa

- whosthatpokemon

Play Who's That Pokemon?

Aliases: wtp, whatsthatpokemon

Vocaloid

Get some kawai pictures of the vocaloids.

- rin

Rin kawai picture

- una

Una kawai picture

- gumi

Gumi kawai picture

- ia

Ia kawai picture

- luka

Luka kawai picture

- fukase

Fukase kawai picture

- miku

Hatsune Miku kawai picture

- len

Len kawai picture

- kaito

Kaito kawai picture

- teto

Teto kawai picture

- meiko

Meiko kawai picture

- yukari

Yukari kawai picture

- miki

Miki kawai picture

- lily

Lily kawai picture

- mayu

Mayu kawai picture

- aoki

Aoki kawai picture

- zola

Zola kawai picture

- diva

Random picturs from Project Diva

Invites

Get invites information about the server

- `invitestats`

Displays the top 10 most used invites in the guild.

My Support

Having problems with me? Then you can get the help here.

- `vote`

Get all the voting links

- `about`

Tells you information about the bot itself.

```
Aliases: stats
```

- `invite`

Generates my invite link for your server

```
Aliases: invite
```

- `supportserver`

Generates my support server invite

- `privacy`

Get the Privacy Policy

- ping

Get the Latency

- source

Displays my full source code or for a specific command.

Parameters Required: command

Info

Get's the Information about the server

- avatar

Get the avatar of you or someone else

Parameters Required: user

- joinedat

Check when a user joined the current server

Parameters Required: user

- server

Check info about current server

Aliases: serverinfo

- server_icon

Parent: [server](#)

Get the current server icon

```
Aliases: icon
```

- banner

Parent: [server](#)

Get the current banner image

- user

Get user information

```
Parameters Required: user
```

```
Aliases: whois, who, userinfo
```

Snipe

“Snipes” someone’s message that’s been edited or deleted.

- snipe

“Snipes” someone’s message that’s been edited or deleted.

Support

Displays the support command for the server, this can only be used if the owner has enabled it

- support

Open support ticket if enabled by the server admins

- resolved

Resolves the existing ticket!

Parameters Required: member

Usage: [prefix]resolved <member.mention>

Aliases: resolve, resolves

- chksupreq

Checks who still requires the support.

Aliases: check_who_require_support, cksupreq, supreq, sup_req, checksupport, check_support

- feedback

Sends your feedback about the server to the server owner. (This can only be done if it is enabled by the server admin)

Parameters Required: feed

Weather

Get weather data from <https://openweathermap.org>

- weather

Display weather in a given location

Parameters Required: location

Aliases: we

- CO

Parent: [weather](#)

Display weather in a given location

Parameters Required: lat, lon

Aliases: coords, coordinates

- zip

Parent: [weather](#)

Display weather in a given location

Parameters Required: zipcode

- cityid

Parent: [weather](#)

Display weather in a given location

Parameters Required: cityid

Encoding

Convert messages into fun encodings

- charinfo

Shows you information about a number of characters.

Parameters Required: characters

- hash

Various hashing commands

- md5

Parent: [hash](#)

MD5 Encrypt Text

Parameters Required: txt

- sha1

Parent: [hash](#)

SHA1 Encrypt Text

Parameters Required: txt

- sha256

Parent: [hash](#)

SHA256 Encrypt Text

Parameters Required: txt

- sha512

Parent: [hash](#)

SHA512 Encrypt Text

Parameters Required: txt

- encode

Encode a string.

- rot

Parent: [encode](#)

Encode a caesar cipher message with specified key

Parameters Required: rot_key, message

Aliases: caesar

- braille

Parent: [encode](#)

Encode text into braille unicode characters

Parameters Required: message

- b16

Parent: [encode](#)

Encode text into base 16

Parameters Required: message

Aliases: base16

- b64

Parent: [encode](#)

Encode text into base 64

Parameters Required: message

Aliases: base64

- hex

Parent: [encode](#)

Encode text into hexadecimal

Parameters Required: message

- b32

Parent: [encode](#)

Encode text into base 32

Parameters Required: message

Aliases: base32

- chr

Parent: [encode](#)

Encode message into character numbers

Parameters Required: message

Aliases: character

- dna

Parent: [encode](#)

Encodes a string into DNA 4 byte ACGT format

Parameters Required: message

- binary

Parent: [encode](#)

Encode text into binary sequences of 8

Parameters Required: message

- decode

Decode a string.

- b32

Parent: [decode](#)

Decode base32 text

Parameters Required: message

Aliases: base32

- chr

Parent: [decode](#)

Decode character numbers to a message

Parameters Required: message

Aliases: character

- binary

Parent: [decode](#)

Decode binary sequences of 8

Parameters Required: message

- b16

Parent: [decode](#)

Decode base16 text

Parameters Required: message

Aliases: base16

- rot

Parent: [decode](#)

Decode a caeser cipher message with specified key

Parameters Required: rot_key, message

Aliases: caeser

- b64

Parent: [decode](#)

Decode base 64 text

Parameters Required: message

Aliases: base64

- braille

Parent: [decode](#)

Decode braille unicode characters to ascii

Parameters Required: message

- dna

Parent: [decode](#)

Decodes a string of DNA in 4 byte ACGT format.

Parameters Required: message

- hex

Parent: [decode](#)

Decode a hexadecimal sequence to text

Parameters Required: message

Games

Play some amazing games

- tictactoe

Play Tictactoe with yourself or your friend!

Parameters Required: member

Usage: [prefix]tictactoe <other player.mention>

Aliases: tc

- connectfour

Play Amazing Connect Four Game

Parameters Required: member

Usage: [prefix]connectfour [other player.mention]

Aliases: connect_four, c4, cf

- hangman

Play Hangman!

Aliases: hg

- akinator

Play Akinator

Aliases: aki

- typeracer

Check your typing speed via a simple typeracer test

Aliases: wpm, typingspeed

- chatbot

Talk with me!

```
Aliases: cb
```

- reaction

Yum Yum or Yuck Yuck?

Elements

Display information from the periodic table of elements

- element

Display information about an element

```
Parameters Required: element, measurement
```

- elements

Display information about multiple elements

```
Parameters Required: elements
```

- ptable

Display a menu of all elements

Random

Some random fun and usefull commands.

- braille

Parameters Required: user

- insult

Insult a user

Parameters Required: user

Usage: [prefix]insult <member.mention>

Aliases: takeitback

- owoify

Owoify the message

Parameters Required: text

Usage: [prefix]owoify {text}

- magic

See magic!

Parameters Required: user

- qr

Generates easy QR Code

Parameters Required: colour, url

- remind

A simple reminder

```
Parameters Required: time, reminder
```

```
Usage: [prefix]remind <time> <reminder> (Time needs to be in seconds...)
```

- sn

Introduce yourself to everyone

```
Parameters Required: name
```

```
Usage: [prefix]sn <name>
```

- tts

Generate text to speech messages

```
Parameters Required: text
```

```
Usage: [prefix]tts <text>
```

- show_color

Enter a color and you will see it!

```
Parameters Required: color
```

```
Usage: [prefix]show_color <hexadecimal colour code>
```

```
Aliases: color, colour, sc
```

- mystbin

Generate an Mystbin for yourself

Parameters Required: text

Usage: [prefix]mystbin <text>

Aliases: myst

- getmystbin

Get your Mystbi using your id

Parameters Required: id

Usage: [prefix]getmystbin <mystbin_id>

Aliases: getmyst

- 8ball

Ask questions about your future

Parameters Required: question

Usage: [prefix]8ball <question>

Developer

These set of commands are only locked to the developer

- dev

These set of commands are only locked to the developer

Parameters Required: command

- sharedservers

Parent: [dev](#)

Get a list of servers the bot shares with the user.

Parameters Required: user

Usage: [prefix]dev sharedservers <user>

- changestat

Parent: [dev](#)

Change the bot status

- stream

Parent: [dev](#) [changestat](#)

Streaming Activity

Parameters Required: activity

- game

Parent: [dev](#) [changestat](#)

Game Activity

Parameters Required: activity

- watching

Parent: [dev](#) [changestat](#)

Watching activity

Parameters Required: activity

- listening

Parent: [dev changestat](#)

Listening Activity

```
Parameters Required: activity
```

- post_commands

Parent: [dev](#)

Posts commands to different botlist

```
Parameters Required: print_logs
```

```
Usage: [prefix]dev post_commands [print_logs]
```

```
Aliases: post_command
```

- createinvite

Parent: [dev](#)

Create an invite to the specified server

```
Parameters Required: guild
```

```
Usage: [prefix]dev createinvite <server ID>
```

- pretend

Parent: [dev](#)

Execute my commands pretending as others | usage: eg:)own as @Minato
angel

```
Parameters Required: target, command_string
```

- eval

Parent: [dev](#)

Evaluates python code

```
Parameters Required: body
```

- post_stats

Parent: [dev](#)

Posts stats to different botlist

```
Parameters Required: print_logs
```

```
Usage: [prefix]dev post_stats [print_logs]
```

- sync

Parent: [dev](#)

Sync with GitHub and reload all the cogs

Giveaway

Helps you to organise a simple giveaway.

- giveaway

Allows you to to create giveaway by answering some simple questions!

```
Aliases: gcreate, gcr, giftcr
```

- giftrrl

It picks out the giveaway winners

Parameters Required: giveaway_id

Usage: [prefix]giftrrl <giveaway id> [channel]

Aliases: gifreroll, gftroll, grr, giftroll, giveawayroll, giveaway_roll, reroll

- giftdel

Cancels the specified giveaway

Parameters Required: giveaway_id

Usage: [prefix]giftdel <giveaway id>

Aliases: gifdel, gftdel, gdl

Image Manipulation

Some fun Image Manipulation Commands

- wni

Prove that you are not sus!

Parameters Required: member

Usage: [prefix]wni [member.mention | member.id]

- wi

Prove anyone that they are sus!

Parameters Required: member

Usage: [prefix]wi [member.mention | member.id]

- triggered

Make anyone triggered

Parameters Required: member

Usage: [prefix]triggered [member.mention | member.id]

- message

Send a fake Discord message

Parameters Required: member, text

Usage: [prefix]message [discord.member.mention.to.send | member.id]
<your.message>

- captcha

Captcha v3 Image mockup

Parameters Required: member, text

Usage: [prefix]captcha <member.mention, captcha.text>

- pixel

Pixallate your pfp

Parameters Required: member

Usage: [prefix]pixel [member.mention | member.id]

- jail

Jail yourself or someone

Parameters Required: member

Usage: [prefix]jail [member.mention | member.id]

- wanted

Get yourself or someone listed in Bingo Book

Parameters Required: member

Usage: [prefix]wanted [member.mention | member.id]

- rainbow

Rainbow light effect

Parameters Required: member

Usage: [prefix]rainbow [member.mention | member.id]

- gay

Seperate yourself/others and mark them/yourself as gay!

Parameters Required: member

Usage: [prefix]gay [member.mention | member.id]

- trash

Puts trash into trashbin

Parameters Required: member

Usage: [prefix]trash [member.mention | member.id]

- delete

Removes trash from bin

Parameters Required: member

Usage: [prefix]delete [member.mention | member.id]

Aliases: delete_trash, dt

- angel

Be an Angel

Parameters Required: member

Usage: [prefix]angel [member.mention | member.id]

- satan

Be the Devil

Parameters Required: member

Usage: [prefix]satan [member.mention | member.id]

- charcoal

Get your pfp beautiful charcoal paint

Parameters Required: member

Usage: [prefix]charcoal [member.mention | member.id]

Aliases: chp, chpaint, charcoal_paint, charcoalp

- hitler

Hail Hitler

Parameters Required: member

Usage: [prefix]hitler [member.mention | member.id]

- wasted

GTA V wasted screen

Parameters Required: member

Usage: [prefix]wasted [member.mention | member.id]

- bomb

Bomb someone

Parameters Required: member

Usage: [prefix]bomb [member.mention | member.id]

- pat

Pat someone, UwU!

Parameters Required: member

Usage: [prefix]pat [member.mention | member.id]

- spank

Spank someone

```
Parameters Required: member
```

```
Usage: [prefix]spank [member.mention | member.id]
```

- slap

Slap someone

```
Parameters Required: member
```

```
Usage: [prefix]slap [member.mention | member.id]
```

- hug

Hug someone

```
Parameters Required: member
```

```
Usage: [prefix]hug [member.mention | member.id]
```

- poke

Poke someone

```
Parameters Required: member
```

```
Usage: [prefix]poke [member.mention | member.id]
```

- high5

Do a highfive

Parameters Required: member

Usage: [prefix]high5 [member.mention | member.id]

- party

Party with someone

Parameters Required: member

Usage: [prefix]party [member.mention | member.id]

BackUp

Create a backup for your server

- backup

Backup related commands

Parameters Required: command

- apply

Parent: [backup](#)

Applies backup template to the server. This may take a lot of time.

Parameters Required: code

Usage: [prefix]backup apply <code>

- template

Parent: [backup](#)

Create a backup of this guild, (it backups only those channels which is visible to the bot)

Aliases: templates

- get

Parent: [backup](#)

Gets the json file which is stored as a backup

Parameters Required: code

Usage: [prefix]backup get <code>

- channellogs

Parent: [backup](#)

Creat a backup of all channel data as json files This might take a long time

Parameters Required: channel, send

Usage: [prefix]backup channellogs [channel.mention | channel.id]

Aliases: channelbackup

- delete

Parent: [backup](#)

Deletes the backup data if it is there in the database.

Parameters Required: args

Usage: [prefix]backup delete <args>

- serverlogs

Parent: [backup](#)

Create a backup of all server data as json files This might take a long time

```
Aliases: serverbackup
```

- attachments

Parent: [backup](#)

Backups the attachment(s) of the specified channel or channel in which command was run

```
Parameters Required: channel
```

```
Usage: [prefix]backup attachments [channel.mention]
```

Moderation

Some simple moderation commands

- setdelay

Sets Slowmode Of A Channel

```
Parameters Required: seconds
```

```
Usage: [prefix]setdelay <time in seconds>
```

- kick

A command which kicks a given user

```
Parameters Required: member, reason
```

```
Usage: [prefix]kick <user> [reason]
```

- ban

A command which bans a given user

```
Parameters Required: member, reason
```

```
Usage: [prefix]ban <user> [reason]
```

- banlist

Shows list of users who have been banned! Or position of a specified user who was banned!

```
Parameters Required: member
```

```
Usage: [prefix]banlist [member.id ,member.mention or member.name.with.tag]
```

- softban

Soft bans a member from the server.

```
Parameters Required: member, reason
```

- unban

Unbans a member from the server.

```
Parameters Required: member, reason
```

- ar

Adds a role to a given user

Parameters Required: member, role, reason

Usage: [prefix]ar <member.mention> <role>

- multiban

Bans multiple members from the server.

Parameters Required: members, reason

- massban

Mass bans multiple members from the server.

Parameters Required: args

- warn

Warn a user

Parameters Required: member, reason

Usage: [prefix]warn <member.mention> [optional: reason]

- warnlist

Get the no. of warns for a specified user

Parameters Required: member

Usage: [prefix]warnlist [member.mention]

- newusers

Tells you the newest members of the server.

Parameters Required: count

Usage: [prefix]newusers [count]

Aliases: newmembers

- cleanup

Cleans up the bot's messages from the channel.

Parameters Required: search

- simeplepurge

A command which purges the channel it is called in

Parameters Required: amount

Usage: [prefix]simeplepurge [amount]

- remove

Removes messages that meet a criteria.

Aliases: purge

- custom

Parent: [remove](#)

A more advanced purge command.

Parameters Required: args

- bot

Parent: [remove](#)

Removes a bot user's messages and messages with their optional prefix.

Parameters Required: prefix, search

Aliases: bots

- user

Parent: [remove](#)

Removes all messages by the member.

Parameters Required: member, search

- all

Parent: [remove](#)

Removes all messages.

Parameters Required: search

- emoji

Parent: [remove](#)

Removes all messages containing custom emoji.

Parameters Required: search

Aliases: emojis

- files

Parent: [remove](#)

Removes messages that have attachments in them.

Parameters Required: search

- embeds

Parent: [remove](#)

Removes messages that have embeds in them.

Parameters Required: search

- images

Parent: [remove](#)

Removes messages that have embeds or attachments.

Parameters Required: search

- reactions

Parent: [remove](#)

Removes all reactions from messages that have them.

Parameters Required: search

- contains

Parent: [remove](#)

Removes all messages containing a substring.

Parameters Required: substr

- timeout

Timeout the member for a specified duration of time

Parameters Required: duration, member, reason

Aliases: mute

- untimeout

Removes timeout from the member

Parameters Required: member, reason

Aliases: unmute

- voicemute

Mutes the members from all the voice channels

Parameters Required: member, reason

Aliases: vcmute

- voiceunmute

Unmutes the members all from the voice channels

Parameters Required: member, reason

Aliases: vcunmute

- serverdeafen

Deafens the member from all the voice channels

Parameters Required: member, reason

Aliases: serverdeaf

- serverundeafen

Un-deafen the member all from the server

Parameters Required: member, reason

Aliases: serverundeaf

- suppress

Suppresses the members from all the stage channels

Parameters Required: member, reason

Aliases: stagesuppress, stagemute

- unsuppress

Un-Suppresses the members from all the stage channels

Parameters Required: member, reason

Aliases: stageunsuppress, stageunmute

- lock

Locking Commands

- threadchannel

Parent: [lock](#)

Locks the specified thread channel(s), both member and bot required
Manage Thread perms to operate

Parameters Required: channels

Usage: [prefix]lock threadchannel [thread.channel]

Aliases: thread

- textchannel

Parent: [lock](#)

Locks the specified text channel(s), both member and bot required
Manage Channel perms to operate

Parameters Required: channels

Usage: [prefix]lock textchannel [text.channel]

Aliases: text

- unlock

Unlocking Commands

- textchannel

Parent: [unlock](#)

Unlocks the specified text channel(s), both member and bot required
Manage Channel perms to operate

Parameters Required: channels

Usage: [prefix]unlock textchannel [text.channel]

Aliases: text

- threadchannel

Parent: [unlock](#)

Unlocks the thread channel in which the command was rrun, both member
and bot required Manage Thread perms to operate

Usage: [prefix]unlock threadchannel [thread.channel]

Aliases: thread

- jointhread

Joins the specified thread

Parameters Required: channel

Aliases: threadjoin

AntiRaid

Antiraid system commands to use

- raid

Controls raid mode on the server.

Aliases: raids, antiraid

- off

Parent: [raid](#)

Disables raid mode on the server.

Aliases: disable, disabled

- on

Parent: [raid](#)

Enables basic raid mode on the server.

Parameters Required: channel

Aliases: enable, enabled

- strict

Parent: [raid](#)

Enables strict raid mode on the server.

Parameters Required: channel

- mentionspam

Enables auto-banning accounts that spam mentions.

Parameters Required: count

- ignore

Parent: [mentionspam](#)

Specifies what channels ignore mentionspam auto-bans.

Parameters Required: channels

Aliases: bypass

- unignore

Parent: [mentionspam](#)

Specifies what channels to take off the ignore list.

Parameters Required: channels

Aliases: protect

Server Setup

Do some necessary setup through an interactive mode.

- setup

This commands setups some logging system for system for server with some nice features

- starboard

Parent: [setup](#)

Setups the starboard in your server.

Parameters Required: channel, no_of_stars, self_star, ignore_nsfw

```
Usage: [prefix]setup starboard <channel> [no_of_stars] [self_star]
[ignore_nsfw]
```

- add

Parent: [setup](#)

This command adds logging of the following things in the specified text channel

```
Parameters Required: add_type, channel
```

```
Usage: [prefix]setup add <add_type> <textchannel>
```

- support

Parent: [setup](#)

Creates a **public support system** in an interactive manner.

```
Parameters Required: textchannel, support_required_role
```

```
Usage: [prefix]setup support <textchannel.mention> <support_required_role>
```

- badlinks

Parent: [setup](#)

If enabled then it checks against any scam, phishing or adult links which is posted by members and take actions accordingly

```
Parameters Required: action, logging_channel, option
```

```
Usage: [prefix]setup badlinks <option> [action] [logging_channel]
```

- raw_data

It returns the raw data which is stored in the database in the form of json

- deletedata

This command deletes the available data:

```
Parameters Required: type_data
```

```
Usage: [prefix]deletedata [type_data]
```

Reaction Roles

Setup some reaction roles

- rr

Reaction Roles related commands

```
Parameters Required: command
```

```
Aliases: reaction_roles
```

- delete_reaction_roles

Parent: [rr](#)

It deletes the reaction roles

```
Parameters Required: reaction_roles_id
```

```
Usage: [prefix]rr delete_reaction_roles <reaction_roles_id aka message.id
```

```
Aliases: del_rr
```

- new

Parent: `rr`

Create a new reaction role using some interactive setup.

```
Aliases: create
```

Badges

Create fun fake badges based on your discord profile

- badges

Creates a fun fake badge based on your discord profile

```
Parameters Required: badge
```

```
Aliases: badge
```

- gbadges

Creates a fun fake gif badge based on your discord profile

```
Parameters Required: badge
```

```
Aliases: gbadge
```

- listbadges

List the available badges that can be created

Music

Listen to some soothing music!

- join

Joins the voice channel

- leave

Disconnects from a voice channel

- play

Plays the requested music

```
Parameters Required: url
```

```
Usage: [prefix]play <music.url | music.name>
```

- pause

Pauses the current music playing

- resume

Resumes music

- stop

Stops the Music Player

- loop

Iterates the current playing song

- **queue**

Displays the songs queue

- **np**

Gives info about current playing song

- **skip**

Skips the current playing song

- **volume**

Changes the volume for the current song

Parameters Required: vol

Usage: [prefix]volume <value between 1-100>

Aliases: vol

- **remove_song**

Song the specified song using its index value

Parameters Required: index

Usage: [prefix]remove_song <song.index.value>

Jishaku

The frontend subclass that mixes in to form the final Jishaku cog.

- pip

Parent: [jishaku](#)

Shortcut for 'jsh sh pip'. Invokes the system shell.

Parameters Required: argument

- show

Parent: [jishaku](#)

Shows Jishaku in the help command.

- repeat

Parent: [jishaku](#)

Runs a command multiple times in a row.

Parameters Required: times, command_string

- tasks

Parent: [jishaku](#)

Shows the currently running jishaku tasks.

- override

Parent: [jishaku](#)

Run a command with a different user, channel, or thread, optionally bypassing checks and cooldowns.

Parameters Required: overrides, command_string

Aliases: execute, exec, override!, execute!, exec!

- cancel

Parent: [jishaku](#)

Cancels a task with the given index.

Parameters Required: `index`

- load

Parent: [jishaku](#)

Loads or reloads the given extension names.

Parameters Required: `extensions`

Aliases: `reload`

- debug

Parent: [jishaku](#)

Run a command timing execution and catching exceptions.

Parameters Required: `command_string`

Aliases: `dbg`

- cat

Parent: [jishaku](#)

Read out a file, using syntax highlighting if detected.

Parameters Required: `argument`

- source

Parent: [jishaku](#)

Displays the source code for a command.

Parameters Required: `command_name`

Aliases: `src`

- invite
